EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Claim 36, line 2. "a substrate" has been changed to --said substrate--.

Claim 37 (new): --Method of draining a substrate by enclosing said substrate within the EKG structure as described in claim 30 and applying an electric field between the first and second electrodes.--

4. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or make obvious and electrokinetic geosynthetic ('EKG') structure substantially enclosing, surrounding and contacting an outer peripheral surface of a core of substrate to be treated, comprising a porous geosynthetic sheath comprising geosynthetic material including at least one electrically conducting element comprising a first electrode on said sheath so as to be in direct contact with said core of substrate and to

provide a conductive path with said substrate, and at least one second electrode extending into the core through an opening in the sheath and laterally spaced from the sheath. Note that the sheath must have a first electrode on the sheath and at least one second electrode extending through an opening in the sheath and laterally spaced from the sheath. The method of using such an EKG for drainage or treatment of the substrate is likewise not taught or obvious.
